

SYNTHETIC TEST DATA - NOT A VALID ATO

Operational Annexes and Evidence Register

Flank Speed IL5 - Microsoft 365 DoD Tenant (Synthetic)

Fixture / version: SYN-FS-IL5-001 / 2.0

Scenario date: 2026-09-24

Environment: Flank Speed-inspired Microsoft 365 DoD collaboration tenant, using the Office 365 DoD service environment as public context rather than GCC High. Exchange Online, SharePoint Online, OneDrive, and Teams are candidate in-scope service workloads; their actual tenant provisioning and authorized service boundaries have not been verified. The modeled boundary is tenant configuration and operation plus explicitly qualified candidate inherited service protections.

SYNTHETIC TEST DATA - NOT A VALID ATO

Tenant operations, continuous monitoring and evidence handling with specific notional handoffs. These are proposed exercise procedures, not proof that Navy or Microsoft operations follow these settings.

This is an original production-style test scenario. It is not an official Navy, Microsoft, DISA, eMASS or FedRAMP submission. All operational settings and findings are invented; public service descriptions do not establish this tenant's authorization or control effectiveness.

Milestone	Fixture disposition
Source documents	Generated synthetic reference material
Assessment evidence	Four fictional samples; other evidence explicitly absent
Control status	Illustrative; not assessed
Authorization	Unsigned, not effective; no inheritance verified
SPIN workflow	Receipt, analysis, review, approval and publication remain separate

SYNTHETIC TEST DATA - NOT A VALID ATO

FS-PROC-001 | Notional identity onboarding, privilege review, and departure handoff

Accountable role: FS-ROLE-003

1. Receive an authoritative customer eligibility or departure notice through an approved channel; record receipt time and mission owner without copying unnecessary personnel details.
2. For onboarding, verify sponsor, purpose, training, unique identity, and approved authentication interface before proposing any tenant access.
3. For administrative access, select the narrowest supported role, use a separate identity, obtain independent approval, and set an approved duration; verify cloud/SKU availability before relying on optional elevation tooling.
4. For departure, initiate tenant restriction and role removal within the notional four-hour window, coordinate issuer revocation externally, and test workload and residual-session access.
5. Send mailbox/OneDrive preservation and successor decisions to records and mission owners; do not equate disablement with permission to delete content.
6. Reconcile all twelve privileged assignments monthly and thirty ordinary accounts; document current decisions and overdue reviews separately.
7. Preserve minimized access evidence, route the two fictional overdue reviews to FS-POAM-001, and request independent retest before proposing closure.

Exit / handoff criteria: An actual case would require authoritative approval/notice, attributable actions, denied unauthorized access, preservation/ownership handoffs, and independent review. This fixture supplies only an invented worksheet and cannot meet operational exit criteria.

Limitations: No real account operations, authenticator material, personnel records, or approved federation configuration is included. External issuance and endpoint/network duties remain outside the tenant boundary.

SYNTHETIC TEST DATA - NOT A VALID ATO

FS-PROC-002 | Notional tenant policy change and drift control

Accountable role: FS-ROLE-012

1. Record the proposed setting, baseline version, affected components/workloads, reason, implementer, and independent reviewer.
2. Verify that the setting exists and is supported in the intended DoD cloud/SKU; identify provider-controlled behavior rather than inventing a tenant setting.
3. Review security, privacy, sharing, audit, records/hold, and recovery impacts with the relevant owners; keep unresolved conflicts blocked.
4. Define inert test cases, expected allowed/denied behavior, rollback conditions, and evidence to collect without secrets or operational content.
5. Obtain independent approval before any authorized test or rollout; emergency actions require documented authority and next-business-day retrospective.
6. Compare observed before/after values and execution results; rollback only through approved authority when exit criteria fail.
7. Update the baseline and inventory only after verified outcomes; retain drift as an unresolved issue rather than changing expected values to hide it.

Exit / handoff criteria: Actual change completion would require approval, verified supported settings, passing positive/negative tests, rollback readiness, and updated evidence. The retention proposal in FS-EV-003 remains blocked and FS-FIND-006 remains open.

Limitations: The sample is a proposal worksheet, not an executed change. The tenant board cannot authorize provider infrastructure maintenance or assume optional product availability.

SYNTHETIC TEST DATA - NOT A VALID ATO

FS-PROC-003 | Notional external sharing and exception lifecycle

Accountable role: FS-ROLE-007

1. Receive a mission-purpose request identifying recipient organization, information category, intended workload paths, duration, and accountable sponsor.
2. Obtain recipient eligibility, external-system conditions, privacy/release authority, and data-owner approval before enabling any exchange.
3. Verify actual sharing/federation feature support; default-deny anonymous and unapproved external access rather than assuming labels or DLP provide enforcement.
4. Set a named-recipient restriction and expiry no longer than thirty days where supported; use documented approved controls and identify unsupported expiry mechanisms as gaps.
5. Test an approved recipient and unapproved/expired recipient with inert content across each affected site, OneDrive workspace, or Teams relationship.
6. Review all twenty notional exceptions weekly, contact sponsors seven days before expiry, and revoke unrenewed or withdrawn approvals.
7. Verify denied access after revocation, retain the evidence and approval trail, and submit prospective FS-POAM-002 closure material for independent review.

Exit / handoff criteria: An actual exchange requires complete purpose/recipient/authority/expiry records and verified enforcement, including denied expired access. The invented missing-expiry proposal is not eligible for enablement or closure.

Limitations: No external invitation or content transfer is performed. Recipient endpoints and systems remain outside scope; optional Purview/label/DLP behavior requires cloud/SKU and coverage verification.

SYNTHETIC TEST DATA - NOT A VALID ATO

FS-PROC-004 | Notional incident triage, evidence preservation, and reporting

Accountable role: FS-ROLE-005

1. Record event time, ingestion time, source, actor/target aliases, suspected impact, and confidence; distinguish a source gap from an actual security incident.
2. Triage high-priority events within thirty minutes of ingestion and identify the authorized containment decision maker.
3. Preserve available records with provenance, collection time, integrity digest, and custody; restrict access and avoid collecting content unrelated to the investigation.
4. Coordinate tenant identity restriction, role removal, or sharing revocation using approved authority; hand external endpoint/network investigation to its separate owner.
5. Notify the internal incident authority within the notional one-hour exercise target and apply actual customer-mandated deadlines only after they are established.
6. If provider escalation is needed, draft only minimized sanitized workload/timing details and obtain handling approval; support remains outside the service accreditation boundary.
7. Reconcile recovery with mission/data owners, retain lessons learned and unresolved gaps, and obtain independent review before closing any actual incident.

Exit / handoff criteria: Actual handling requires attributable decisions, preserved evidence, authorized reporting, verified containment/recovery, and mission acceptance. No incident or reporting action occurred in this fixture.

Limitations: Example.test contacts are nonoperational. No real reporting authority or regulatory deadline is asserted. Optional Defender, advanced audit, or external SIEM integrations are not assumed.

SYNTHETIC TEST DATA - NOT A VALID ATO

FS-PROC-005 | Notional continuity and four-workload recovery rehearsal

Accountable role: FS-ROLE-010

1. Confirm mission priorities, approved recovery objectives, external dependencies, and authorized isolated test scope with the system and data owners.
2. Inventory actual recoverable sources and service limits for mailbox items, SharePoint content/permissions, OneDrive ownership, and Teams membership/linked content.
3. Select at least three inert objects per workload and record content, owner, permissions, references, recoverable age, and expected outcomes before any test.
4. Verify that chosen mechanisms and prerequisites are available in the DoD cloud/SKU; document unsupported objects instead of treating retention/version history as universal backup.
5. Execute only authorized isolated recovery actions, measure real elapsed time, and record errors and dependencies without deleting production content.
6. Compare content, ownership, permissions, links, revoked-user denial, and audit visibility with the pre-state; obtain independent observation and data-owner reconciliation.
7. Record objective deviations and unsupported recovery paths in the continuity plan and FS-POAM-004; request explicit risk treatment and independent retest before closure.

Exit / handoff criteria: An actual exercise needs all four workload classes and at least twelve objects reconciled, measured timing, supported recovery-source evidence, and independently reviewed limitations. The partial invented worksheet does not meet this threshold.

Limitations: No restore commands were executed. Provider service restoration is not customer content restoration. Third-party backup and external continuity platforms are excluded and cannot silently satisfy gaps.

SYNTHETIC TEST DATA - NOT A VALID ATO

FS-PROC-006 | Notional records hold, disposition, and conflict resolution

Accountable role: FS-ROLE-006

1. Obtain actual records schedule authority, processing purpose, and authorized preservation instructions; treat the fixture's two-year/seven-year periods as invented placeholders.
2. Map custodians and affected content across Exchange, SharePoint, OneDrive, and Teams-related storage without assuming one policy covers every workload.
3. Verify retention/hold/eDiscovery mechanisms and precedence in the actual DoD cloud/SKU; request provider documentation for uncertain behavior.
4. Block proposed disposition and policy promotion when preservation scope, release authority, or conflicting instructions are unresolved.
5. Test at least five held and five eligible inert objects in an authorized isolated scope, recording preservation and documented deletion lifecycle.
6. Require records/counsel release and independent change approval before any affected disposition; distinguish logical deletion from physical media sanitization.
7. Retain release, test, and conflict-resolution evidence for independent FS-POAM-006 review; report unavailable historical retention evidence honestly.

Exit / handoff criteria: An actual disposition requires valid authority, resolved conflicts, verified workload behavior, release where applicable, and independent approval. The invented blocked proposal remains unresolved and no content is disposed.

Limitations: No legal instruction, approved government retention schedule, media certificate, or real hold exists here. Preservation and retention do not guarantee backup or complete restore.

SYNTHETIC TEST DATA - NOT A VALID ATO

FS-PROC-007 | Notional assessment evidence custody and inheritance review

Accountable role: FS-ROLE-008

1. Classify each requested item as an original authorized source, a derived copy with provenance, a synthetic sample, or not supplied; never promote a sample into operational evidence.
2. Record owner, applicable service/component/control scope, collection date, review cycle, handling restrictions, and integrity/custody details for actual received evidence.
3. Request provider packages only through legitimate approved channels; confirm exact DoD service applicability and distinguish GCC High and excluded support service.
4. Map candidate inherited duties separately from tenant configuration and retained customer endpoint, network, personnel, privacy, and mission duties.
5. Execute authorized examine/interview/test procedures against the complete applicable baseline, retaining negative results and evidence limitations rather than selecting only passing examples.
6. For each proposed POAM closure, require actual corrective-action evidence and independent retest; leave closureEvidence empty until material is genuinely submitted.
7. Present residual risk and unresolved evidence to a real designated decision authority; no fixture status, import action, or planned date activates an authorization.

Exit / handoff criteria: Actual assessment readiness requires current applicable evidence, executed procedures, a complete baseline, independent findings/closure review, and an authorized decision process. None is completed by this source fixture.

Limitations: Only four invented samples are included and twelve requested packages are absent. There are no signatures, seals, real assessment attestations, accepted closure records, or effective decisions.

SYNTHETIC TEST DATA - NOT A VALID ATO

Continuous monitoring strategy

All frequencies, thresholds and targets are fictional policy selections. Actual contractual obligations and approved DoD reporting channels take precedence. Do not conflate service health with control effectiveness.

FS-MON-001 | Notional workforce lifecycle reconciliation

Frequency / owner: Monthly plus every authoritative termination notice / FS-ROLE-003

Measure / threshold: Sponsor/eligibility completeness for 30 ordinary accounts; elapsed restriction time for every departure; separate residual-session checks. / 100% current sponsor/eligibility in sample; tenant restriction within 4 hours of notice; zero untracked residual-access paths.

Action / evidence: Restrict unjustified access using approved authority, notify mission/records owners, and retain an unresolved item when source notice or verification is missing. / FS-EV-002, FS-EV-007, FS-EV-013

FS-MON-002 | Notional privileged-assignment and emergency-access review

Frequency / owner: Monthly; immediately after emergency use / FS-ROLE-003

Measure / threshold: Independent current reviews across all 12 assignments; emergency-use notification and next-business-day review. / 12 of 12 reviewed; zero expired approvals; 100% emergency uses independently reviewed by next business day.

Action / evidence: Escalate overdue assignments to the system owner within one business day and approve/remove through documented authority; retain FS-FIND-001 until independent acceptance. / FS-EV-001, FS-EV-002, FS-EV-007

FS-MON-003 | Notional guest-sharing exception review

Frequency / owner: Weekly and at exception expiry / FS-ROLE-007

Measure / threshold: Completeness and expiry of all 20 exceptions; denied-access verification after revocation. / 20 of 20 have sponsor, purpose, recipient conditions, approval, and expiry no longer than 30 days; all expired links/relationships denied.

Action / evidence: Keep incomplete exchanges restricted, request mission/privacy decisions, and test associated workload paths; do not mark FS-FIND-002 closed on ledger edits alone. / FS-EV-003, FS-EV-008, FS-EV-015

FS-MON-004 | Notional audit-source presence and schema reconciliation

Frequency / owner: Daily presence review; monthly safe test events / FS-ROLE-005

Measure / threshold: Available source categories out of 8, field completeness in 40-event sample, event-to-ingestion delay. / 8 of 8 required sources evidenced; all required fields mapped; test events within approved source-specific delay, nominally 24 hours.

Action / evidence: Open a coverage incident for absent/delayed sources, verify cloud/SKU availability, and notify the security manager; FS-FIND-003 remains open until coverage and limitations are independently reviewed. / FS-EV-001, FS-EV-009

SYNTHETIC TEST DATA - NOT A VALID ATO

FS-MON-005 | Notional audit triage and escalation

Frequency / owner: Daily queue review; high-priority event-driven response / FS-ROLE-005

Measure / threshold: Time from ingestion to analyst triage and completeness of ten sampled dispositions, including three high-priority cases. / High-priority triage within 30 minutes of ingestion; all sampled dispositions have rationale, owner, and escalation decision.

Action / evidence: Escalate missed targets to the duty lead, separate ingestion delay from analyst delay, preserve records, and coordinate external endpoint/mission handoffs as required. / FS-EV-001, FS-EV-009, FS-EV-012

FS-MON-006 | Notional baseline drift and change-record review

Frequency / owner: Monthly and after policy change / FS-ROLE-012

Measure / threshold: Observed versus approved values for 15 settings; approval/rollback completeness for 8 sampled changes. / Zero unexplained deviations; drift assigned within 2 business days; all changes independently approved or emergency-reviewed within 1 business day.

Action / evidence: Hold unapproved changes, assess shared-workload and records impact, and use authorized rollback when needed; never silently replace baseline values to hide drift. / FS-EV-003, FS-EV-006, FS-EV-010

FS-MON-007 | Notional retention, hold, and audit age-boundary review

Frequency / owner: Monthly and before disposition / FS-ROLE-006

Measure / threshold: Hold/schedule conflict count; retrieval at approved audit age boundaries; release approval for held-content disposition. / Zero unresolved conflicts promoted; zero held objects disposed without release; actual evidence for approved retention periods.

Action / evidence: Block conflicting disposition, obtain records/counsel review, verify feature support, and retain FS-FIND-006 until independent tests; insufficient historical age evidence stays unresolved. / FS-EV-003, FS-EV-009, FS-EV-010

FS-MON-008 | Notional four-workload recovery rehearsal

Frequency / owner: Quarterly and after material recovery dependency change / FS-ROLE-010

Measure / threshold: Workload/object coverage, recovery-source age, elapsed recovery, and content/permissions/ownership/link reconciliation. / 4 workloads and at least 12 objects exercised; approved timing/age objectives measured; every mismatch or unsupported type explicitly treated.

Action / evidence: Revise recovery assumptions and POAMs for any gap, request mission priority decisions, and submit independent retest before considering FS-FIND-004 closure. / FS-EV-004, FS-EV-011, FS-EV-016

FS-MON-009 | Notional provider assurance and cryptographic applicability review

Frequency / owner: Annually and after material service or authorization-scope change / FS-ROLE-009

Measure / threshold: Service-specific evidence currency, scope mapping, cryptographic applicability, and completeness of retained-duty assignments. / Applicable authorized evidence for every proposed inherited claim; no unsupported module, service, or authorization assumption.

Action / evidence: Suspend inheritance credit for unsupported claims, request appropriate evidence through approved channels, and retain FS-FIND-005 if access or applicability remains unresolved. / FS-EV-005, FS-EV-014, FS-EV-016

SYNTHETIC TEST DATA - NOT A VALID ATO

FS-MON-010 | Notional vulnerability advisory and tenant flaw triage

Frequency / owner: Each business day for advisories; monthly tenant exposure review / FS-ROLE-002

Measure / threshold: Correct provider/tenant/external-owner assignment and elapsed triage/correction time for tenant-owned defects. / Critical tenant issue assigned within 1 business day; correction targets 7 days critical, 14 high, 30 moderate unless explicitly extended by authority.

Action / evidence: Route provider issues to supplier liaison and endpoint issues outside the tenant boundary; use approved changes and independent retest for tenant flaws. / FS-EV-003, FS-EV-005, FS-EV-006, FS-EV-014

FS-MON-011 | Notional training, privacy-purpose, and contact readiness

Frequency / owner: Monthly eligibility/contact reconciliation; annual training/privacy review / FS-ROLE-006

Measure / threshold: Training currency for sampled users/administrators; documented processing authority for five use cases; reachable exercise primary/backup contacts. / All sampled access grants have required training; all five uses have authority and purpose; no sensitive content proposed for unsupported support handling.

Action / evidence: Withhold unsupported access or processing, obtain retained customer decisions, and update incident handoffs; never use fixture aliases as real reporting contacts. / FS-EV-007, FS-EV-012, FS-EV-013, FS-EV-015

FS-MON-012 | Notional POAM and assessment-readiness review

Frequency / owner: Weekly POAM review; monthly system-owner risk review / FS-ROLE-002

Measure / threshold: Status and next milestone for all 6 POAMs, missing evidence packages, independent retest readiness, and decision effectiveness state. / 6 of 6 POAMs remain visible until formally accepted closure; zero past-due milestones without explicit escalation; decision remains unsigned and ineffective.

Action / evidence: Escalate overdue resources/evidence to the owner within one business day; submit prospective closure material to the independent assessor; never auto-activate the decision or recast synthetic samples as accepted evidence. / FS-EV-005, FS-EV-007, FS-EV-008, FS-EV-009, FS-EV-010, FS-EV-011, FS-EV-016

SYNTHETIC TEST DATA - NOT A VALID ATO

Evidence inventory and custody

Four original fictional examples are printed in this annex. Twelve required evidence items are absent. Describing a missing item is not supplying it. Public links are background references, not controlled provider artifacts.

Evidence / owner	State / source type	Purpose / review cycle
FS-EV-001 Invented audit-event and source-reconciliation excerpt FS-ROLE-005	Synthetic sample included Hand-authored synthetic audit worksheet; not a service export	Invented event rows demonstrate field structure, analyst handoff, and a missing Teams source. No live tenant, real person, actual detector, or assessment execution is represented. Seven-of-eight coverage is a fictional scenario observation, not a measured Microsoft service condition. Review: Notional daily source reconciliation and monthly schema review.
FS-EV-002 Invented access review and departure worksheet FS-ROLE-003	Synthetic sample included Hand-authored synthetic access-governance sample	Twelve invented privileged assignments provide a denominator for the review gap. Ten are marked current only within the fictional worksheet and two overdue. A departure scenario illustrates timestamp and records-handoff fields; it is not evidence that access was actually removed. Review: Notional monthly assignment review; event-driven departure action.
FS-EV-003 Invented policy-change and exception review excerpt FS-ROLE-012	Synthetic sample included Hand-authored synthetic change-board worksheet	Eight invented change cases illustrate approval, rollback, and impact-review fields. The excerpt includes a sharing exception with no expiry and a blocked retention proposal that conflicts with a hold instruction. No configuration was changed, approved, or rolled back. Review: Notional per change; emergency retrospective next business day.
FS-EV-004 Invented partial restore-rehearsal worksheet FS-ROLE-010	Synthetic sample included Hand-authored synthetic recovery exercise sample	A fictional partial exercise demonstrates object-level reconciliation and honest unsupported/incomplete states. Scripted mailbox timing is not a measured restore. Teams and OneDrive cases are not rehearsed even within the invented worksheet, leaving the continuity gap open. Review: Notional quarterly exercise and post-material-change review.
FS-EV-005 Requested provider authorization, inheritance, and cryptographic assurance package FS-ROLE-009	Not supplied Requested authorized provider/customer-responsibility evidence	Requested current service-specific authorized boundary, applicable authorization evidence, shared-responsibility matrix, cryptographic mechanism/module applicability, physical controls, maintenance, storage/media protection, and service limitations. Public references do not substitute. No package, authorization registry verification, or attestation was obtained. Review: Notional annually and on material provider/service change.

SYNTHETIC TEST DATA - NOT A VALID ATO

Evidence / owner	State / source type	Purpose / review cycle
FS-EV-006 Requested tenant baseline and observed configuration exports FS-ROLE-012	Not supplied Requested tenant configuration evidence	Requested dated, minimized exports covering identity, roles, workload permissions, forwarding, sharing, Teams admission, posture-policy interface, audit configuration, and feature/license availability. Expected to include approved target values, observed values, independent review, and exceptions. No actual exports or screenshots supplied. Review: Notional monthly and after approved policy change.
FS-EV-007 Requested authoritative identity, privilege, and membership review records FS-ROLE-003	Not supplied Requested customer/tenant access-governance evidence	Requested sponsor approvals, current independent reviews for all twelve privileged assignments, ordinary-account samples, workload delegations, authenticator lifecycle instructions, and departure action records. Unlike the invented access sample, this package would require genuine authorized source records and actual test results. Review: Notional monthly, with event-driven lifecycle actions.
FS-EV-008 Requested guest-sharing exception and recipient approval register FS-ROLE-007	Not supplied Requested mission-owner and tenant sharing evidence	Requested all twenty notional exception records with sponsor, purpose, recipient eligibility, approved external system conditions, start/expiry, permissions, revocation, and negative-access tests. The invented missing-expiry example is not an issued exception or evidence of actual external access. Review: Notional weekly and on sponsor/recipient change.
FS-EV-009 Requested audit-source coverage, field mapping, and retention tests FS-ROLE-005	Not supplied Requested tenant SOC collection and retrieval evidence	Requested eight-source availability/licensing matrix, collection configuration, event-field mapping, test-event receipts, collection-delay measurements, custody/access evidence, and age-boundary retrieval. No real logs or proof of ninety-day/one-year retention is supplied. Review: Notional daily coverage and monthly retrieval/schema review.
FS-EV-010 Requested records authority, hold-scope, and disposition conflict register FS-ROLE-006	Not supplied Requested customer records/legal and tenant policy evidence	Requested valid schedule authority, hold instructions, workload-specific applicability, verified feature support, custodian mapping, conflict resolution, release approval, and preservation/disposition tests. The two-year/seven-year periods are invented targets, not approved government schedules. Review: Notional monthly and before any affected disposition or policy change.
FS-EV-011 Requested continuity plan and workload recovery/reconciliation records FS-ROLE-010	Not supplied Requested mission continuity and tenant recovery evidence	Requested approved mission priorities, supported recovery-source inventory, provider limitations, twelve-object/four-workload exercise records, permissions/ownership comparisons, timings, independent observation, and data-owner acceptance. No actual restoration or backup evidence is supplied. Review: Notional quarterly exercise, annual plan review, and material-change review.

SYNTHETIC TEST DATA - NOT A VALID ATO

Evidence / owner	State / source type	Purpose / review cycle
FS-EV-012 Requested incident runbook, reporting matrix, and tabletop records FS-ROLE-005	Not supplied Requested customer incident-response evidence	Requested actual authority and reporting deadlines, contact/backup routes, containment approvals, custody records, support redaction checklist, external endpoint handoffs, and incident tabletop results. No incident is asserted to have occurred or been reported. Review: Notional quarterly tabletop and monthly contact review.
FS-EV-013 Requested training, personnel, and privacy-authority records FS-ROLE-006	Not supplied Requested retained customer responsibility evidence	Requested minimized training completion, authoritative personnel handoffs, lawful processing purpose/authority, privacy review, and records-owner decisions. No real person, personnel file, legal opinion, or processing authorization is included. Review: Notional annual training/privacy review and event-driven personnel action.
FS-EV-014 Requested exposure review, provider advisory, and flaw-remediation register FS-ROLE-002	Not supplied Requested supplier assurance and tenant risk-management evidence	Requested authorized provider vulnerability/maintenance assurance, relevant advisories, tenant configuration exposures, external endpoint ownership handoffs, change references, and independent retests. No provider scanning, live vulnerability assessment, or patch-compliance claim is made. Review: Notional daily advisory triage and monthly exposure review.
FS-EV-015 Requested boundary, information-exchange, and external-interface approvals FS-ROLE-001	Not supplied Requested customer boundary and agreement evidence	Requested signed/authorized operational boundary and exchange decisions for federation, posture, recipients, evidence exports, continuity alternatives, and support handling. This fixture supplies only notional flow descriptions; no real agreement, signature, or external connection approval exists. Review: Notional annually, before enablement, and after material interface change.
FS-EV-016 Requested independent assessment and authorization decision record FS-ROLE-008	Not supplied Requested assessment/decision evidence; fixture decision is not evidence	Requested full applicable baseline, approved assessment scope, actual examine/interview/test results, independent closure retests, residual-risk analysis, and decision by a real designated authority. No actual assessment, signed decision, accepted closure, or effective ATO is supplied. Review: Notional annual assessment planning and upon material change or closure request.

SYNTHETIC TEST DATA - NOT A VALID ATO

FS-EV-001 | Invented audit-event and source-reconciliation excerpt

FICTIONAL SAMPLE - generated locally, not collected from a tenant.

Owner / type: FS-ROLE-005 / Hand-authored synthetic audit worksheet; not a service export

Controls / components: AC-6, AU-2, AU-3, AU-6, AU-9, AU-11, CA-7, IR-4 / FS-CMP-001, FS-CMP-002, FS-CMP-003, FS-CMP-004, FS-CMP-005, FS-CMP-006, FS-CMP-007, FS-CMP-008, FS-CMP-011

SYNTHETIC SAMPLE - NOT A SERVICE LOG OR ASSESSMENT RESULT

Worksheet date: 2026-09-24; all timestamps UTC; aliases are invented.

Required source categories: identity sign-in; privileged assignment; Exchange administration; SharePoint sharing; OneDrive sharing; Teams policy; tenant access decision; configuration change.

Invented reconciliation summary: 7 of 8 categories represented in the worksheet; Teams policy absent; no actual collection queries executed.

2026-09-24T08:00:00Z | ingested 08:04:00Z | identity | actor exercise-user-01 | target exercise-session-01 | operation sign-in | outcome denied-missing-required-context | correlation exercise-correlation-a

2026-09-24T08:10:00Z | ingested 08:16:00Z | privileged assignment | actor exercise-admin-02 | target exercise-role-mailbox | operation grant-request | outcome pending-independent-review | correlation exercise-correlation-b

2026-09-24T08:20:00Z | ingested 08:26:00Z | SharePoint sharing | actor exercise-owner-03 | target exercise-document-blue | operation external-link-request | outcome denied-no-current-exception | correlation exercise-correlation-c

Other invented worksheet rows: Exchange rule-change review; OneDrive recipient removal; stale-posture denial; tenant policy proposal. Their presence is illustrative, not proof of event availability.

Invented analyst handoff: exercise-analyst-01 would triage correlation exercise-correlation-b at 08:25:00Z, 9 minutes after ingestion, and request role-review evidence from identity-lead@example.test. This is scripted timing, not a measured SLA.

Missing source action: SOC owner to reconcile Teams DoD event availability/licensing and collect an authorized safe test event before claiming 8-of-8 coverage. Track FS-FIND-003. No operational identifiers, credentials, or content included.

Custody: local synthetic generation only. A real evidence record requires collection time, collector, approved storage, hash and scope/revision binding. No closure or acceptance is implied.

SYNTHETIC TEST DATA - NOT A VALID ATO

FS-EV-002 | Invented access review and departure worksheet

FICTIONAL SAMPLE - generated locally, not collected from a tenant.

Owner / type: FS-ROLE-003 / Hand-authored synthetic access-governance sample

Controls / components: AC-2, AC-6, IA-2, PS-4 / FS-CMP-001, FS-CMP-002, FS-CMP-003, FS-CMP-005, FS-CMP-006

SYNTHETIC SAMPLE - INVENTED ACCESS REVIEW, NO DIRECTORY EXPORT

Review cutoff: 2026-09-24. Proposed review interval: one calendar month.

Invented assignments exercise-admin-01 through exercise-admin-10: worksheet review date 2026-09-01; reviewer alias exercise-reviewer-01; mission purpose field populated. These are fictional entries, not accepted approvals.

exercise-admin-11 | proposed role site administrator | sponsor mission-owner@example.test | last worksheet review 2026-07-31 | current reviewer absent | status overdue in scenario.

exercise-admin-12 | proposed role messaging administrator | sponsor mission-owner@example.test | last worksheet review 2026-08-15 | current reviewer absent | status overdue in scenario.

Worksheet total: 12 assignments; 10 current fictional entries; 2 overdue entries; 83.3% worksheet completeness. No privilege removals executed and no reviewer signature supplied. Track FS-FIND-001.

Invented departure case: exercise-user-30; notice time 2026-09-23T09:00:00Z; scripted restriction time 2026-09-23T11:15:00Z; elapsed 2h15m; actual tenant restriction NOT TESTED. Required checks: sign-in, mailbox delegates, site/OneDrive links, Teams membership, residual sessions.

Content handoff: records-privacy@example.test to check hold applicability; mission-owner@example.test to name a successor before disposition. No personal information, authenticators, real account IDs, submitted closure evidence, or genuine approvals appear.

Custody: local synthetic generation only. A real evidence record requires collection time, collector, approved storage, hash and scope/revision binding. No closure or acceptance is implied.

SYNTHETIC TEST DATA - NOT A VALID ATO

FS-EV-003 | Invented policy-change and exception review excerpt

FICTIONAL SAMPLE - generated locally, not collected from a tenant.

Owner / type: FS-ROLE-012 / Hand-authored synthetic change-board worksheet

Controls / components: AC-4, CM-2, CM-3, CM-6, AU-11, MA-2, MP-6, SI-2 / FS-CMP-003, FS-CMP-004, FS-CMP-005, FS-CMP-006, FS-CMP-009, FS-CMP-010, FS-CMP-011

SYNTHETIC SAMPLE - CHANGE PROPOSALS ONLY; NO TENANT ACTIONS

Worksheet cutoff: 2026-09-24. Invented review batch: 8 changes, including 2 emergency scenarios.

Case exercise-change-a: block external automatic forwarding; implementer exercise-admin-04; independent reviewer field exercise-reviewer-02; proposed baseline value deny; test 5 rules using inert mail; rollback restore prior reviewed rule set only after security approval. All approvals and results are placeholders, not executed.

Case exercise-change-b: named-recipient collaboration for exercise-site-blue; sponsor mission-owner@example.test; recipient exercise-guest@example.test; content Internal Exercise; approval field draft; exception expiry MISSING. One of 20 invented exceptions lacks expiry. Restrict until complete; track FS-FIND-002. No link created.

Case exercise-change-c: routine exercise correspondence disposition after 2 years; affected exercise-site-green also listed in a preservation instruction; records/counsel conflict review MISSING; board state BLOCKED-DRAFT. Proposed hold prevents disposition until authorized release. No item deleted; track FS-FIND-006.

Remaining five invented batch cases: site-owner reassignment, Teams admission-policy review, audit export-role review, emergency guest restriction, and emergency administrator restriction. Detailed operational records not supplied.

Required handoffs: sharing to workload-lead@example.test and mission-owner@example.test; records conflict to records-privacy@example.test; independent security review to issm@example.test. No signatures, effective changes, or accepted closure evidence.

Custody: local synthetic generation only. A real evidence record requires collection time, collector, approved storage, hash and scope/revision binding. No closure or acceptance is implied.

SYNTHETIC TEST DATA - NOT A VALID ATO

FS-EV-004 | Invented partial restore-rehearsal worksheet

FICTIONAL SAMPLE - generated locally, not collected from a tenant.

Owner / type: FS-ROLE-010 / Hand-authored synthetic recovery exercise sample

Controls / components: CP-2, CP-4, CP-9, CP-10 / FS-CMP-003, FS-CMP-004, FS-CMP-005, FS-CMP-006, FS-CMP-012

SYNTHETIC SAMPLE - SCRIPTED RESTORE WORKSHEET; NO SERVICE CALLS EXECUTED

Exercise worksheet date: 2026-09-22. Planned scope: Exchange mailbox items, SharePoint files and permissions, OneDrive departure handoff, Teams membership and linked content. Target 3 inert objects per workload.

Mailbox exercise-object-mail-01: invented pre-state subject 'Exercise harbor planning'; body 'Synthetic collaboration test only'; owner exercise-user-01. Scripted start 09:00 UTC, scripted end 09:18 UTC; 18 minutes is invented. Scripted result: subject/body/owner match worksheet. No real checksum, export, restore log, or operator attestation supplied.

Other 2 mailbox objects not documented.

SharePoint exercise-object-file-01: invented file content 'Exercise agenda version two'; intended owner exercise-owner-03; content comparison field MATCH-IN-SCRIPT; permission comparison PENDING; version and sharing-link verification NOT SUPPLIED.

OneDrive handoff: NOT REHEARSED. Teams membership/content-reference recovery: NOT REHEARSED. Overall scope and 12-object reconciliation incomplete; track FS-FIND-004.

Recovery-source mechanism, licensing, recoverable age, deletion window, and provider limitations NOT VERIFIED.

Retention/version history must not be counted as blanket backup.

Exit review: continuity@example.test would obtain data-owner reconciliation and independent observer review; neither submitted nor accepted. No actual restoration success or recovery objective is claimed.

Custody: local synthetic generation only. A real evidence record requires collection time, collector, approved storage, hash and scope/revision binding. No closure or acceptance is implied.

SYNTHETIC TEST DATA - NOT A VALID ATO

Production-readiness evidence gaps

Before a real submission, obtain controlled provider authorization and customer-responsibility artifacts through approved channels; reconcile actual tenant exports and feature availability; complete baseline tailoring, privacy/interconnection reviews, independent assessment and AO decisions.

- Original synthetic test scenario only. Flank Speed-inspired naming is contextual and does not reproduce or verify the Navy's actual configuration, operational boundary, assessment, or ATO.
- The parent verified the four public reference pages listed below on 2026-09-24. This authoring task made no network requests and did not independently re-fetch those pages.
- The Navy public Flank Speed page could not be retrieved by the parent; no Navy-specific configuration or current authorization status was verified.
- Office 365 DoD is not interchangeable with GCC High. Public service inclusion and IL5 context do not establish the fictional tenant's authorization or inheritance.
- Every inventory entry, target, role, organization, count, event, timestamp, observation, and remediation schedule is notional. No actual assessment procedures, tenant commands, scanning, support requests, or restoration actions were performed.
- No control is claimed implemented, effective, certified, or satisfied. All forty controls are illustrative and not assessed; provider duties are candidates awaiting applicable evidence.
- Only four meaningful invented samples are included; the remaining twelve evidence entries are Not supplied with empty sampleText. None of the sixteen entries is accepted operational evidence.
- All six findings are fictional and Open: two High, three Moderate, one Low. They describe this scenario's review/evidence gaps, not actual vulnerabilities or defects in Navy or Microsoft systems.
- All six matching POAMs have future milestones and empty closureEvidence arrays. No corrective action has been submitted, accepted, or closed.
- The control set is representative, not a complete IL5, FedRAMP High, CNSSI 1253, NIST enhancement, or organization-tailored baseline. Actual control selection and parameters require authority review.
- Cloud, SKU, license, feature behavior, and authorized-boundary availability must be verified for any Purview, Defender, advanced audit, retention/hold, information protection, conditional-access, privileged-management, or other optional mechanism.
- Endpoints, endpoint-management platforms, customer networks, external federation infrastructure, recipient systems, external SIEM/evidence storage, third-party backup, arbitrary Azure resources, and support handling remain outside the modeled tenant boundary.
- No Azure Key Vault, IaaS firewall, VM inventory, AI/Copilot service, unapproved application, real person, real government identifier, credential, signature, seal, classified information, or operational CUI is included.
- Retention, version history, recycle bins, and holds have purpose-specific limits and do not guarantee complete backup, recovery, or preservation of every workload object, permission, or dependency.
- Contacts are nonoperational example.test addresses. Notional reporting times are not asserted as actual DoD regulatory deadlines or contractual service guarantees.
- Evidence cross-references identify planned relevance and requested artifacts, not proof that an artifact exists or satisfies a control. Missing provider evidence is not proof that the provider lacks the underlying protection.
- The decision is an unsigned illustrative conditional ATO draft, not effective. Importing, rendering, publishing a fixture, or reaching a proposed date cannot activate it.

SYNTHETIC TEST DATA - NOT A VALID ATO

- This JSON is a document-content fixture, not OSCAL, an official eMASS/FedRAMP submission template, a source of legal advice, or an application test-result report. Parent generation and manual application validation remain separate.
