

Microsoft 365 - Collaboration

Customer responsibility matrix

SYNTHETIC DEMONSTRATION ONLY. All services, measurements, decisions, identities and evidence in this package are fictional. Not Microsoft provider data, a DoD approval, an IL5 authorization, a customer entitlement, or operational evidence.

Release 1.0 | Scenario date: 2026-09-15 | SaaS collaboration

Exchange Online collaboration mail | AC-2, SC-7

Provider accountable: Maintain documented mail-flow defaults, operator access controls and service-impact notifications for the demo boundary.

Joint handoff: Review approved external mail domains and investigate delivery-policy exceptions with tenant administrators.

Customer accountable: Approve mailboxes, review distribution groups, label messages and enforce mission-specific handling restrictions.

Acceptance artifact: M365-E01: synthetic mail-flow review and mailbox access sample. Review cadence: monthly and after material change. Customer sign-off is required before claiming applicability; an unresolved customer duty remains customer-owned.

Teams meetings and messaging | AC-2, AC-4

Provider accountable: Version baseline meeting policies and track changes to guest, federation and anonymous-join defaults.

Joint handoff: Review external collaboration requests and test meeting restrictions with designated customer administrators.

Customer accountable: Approve team membership, meeting organizers and guests; manage meeting content and user training.

Acceptance artifact: M365-E02: synthetic meeting-policy export and guest access test. Review cadence: monthly and after material change. Customer sign-off is required before claiming applicability; an unresolved customer duty remains customer-owned.

SharePoint and OneDrive content | AC-3, AC-6

Provider accountable: Maintain baseline external-sharing limits and publish tested administrative configuration guidance.

Joint handoff: Validate site exceptions and review sharing reports with customer information owners every month.

Customer accountable: Assign site owners, remove stale sharing links, classify content and approve site-level permissions.

Acceptance artifact: M365-E03: synthetic site-sharing review and access revocation test. Review cadence: monthly and after material change. Customer sign-off is required before claiming applicability; an unresolved customer duty remains customer-owned.

Purview retention and audit | AU-2, AU-6, AU-11

Provider accountable: Maintain audit export schedules and retention-policy templates; document gaps in the customer evidence handoff.

Joint handoff: Confirm licensed functionality before any real deployment and reconcile evidence delivery with customer reviewers.

Customer accountable: Select records schedules, perform legal review, investigate user activity and approve legal holds.

Acceptance artifact: M365-E04: synthetic audit-delivery ledger and retention retrieval rehearsal. Review cadence: monthly and after material change. Customer sign-off is required before claiming applicability; an unresolved customer duty remains customer-owned.

Tenant access safeguards | IA-2, AC-2

Provider accountable: Version MFA and privileged-admin policy guidance and track provider support account approvals.

Joint handoff: Test emergency access procedures and review privileged roles jointly every month.

Customer accountable: Enroll users, enforce device compliance, run joiner/mover/leaver processes and approve conditional-access exceptions.

Acceptance artifact: M365-E05: synthetic MFA policy review and emergency-access rehearsal. Review cadence: monthly and after material change. Customer sign-off is required before claiming applicability; an unresolved customer duty remains customer-owned.
