

Microsoft 365 - Collaboration

Service guide and customer onboarding

SYNTHETIC DEMONSTRATION ONLY. All services, measurements, decisions, identities and evidence in this package are fictional. Not Microsoft provider data, a DoD approval, an IL5 authorization, a customer entitlement, or operational evidence.

Release 1.0 | Scenario date: 2026-09-15 | SaaS collaboration

Service boundary

Only the five listed SaaS collaboration policy services; independent of Azure shared infrastructure and its customer allocations.

Environment: Flank Speed Demo (fictional tenant; separate service boundary).

Exclusions

Azure hubs and subscriptions, mission applications, endpoint compliance operations, telephony carriers, third-party apps, real tenant entitlements, and actual Flank Speed authorization.

Synthetic hosting identity

SYNTHETIC DEMONSTRATION ONLY. Fictional hosting identity; kind=Service; serviceId=synthetic-m365-collaboration-001; serviceName=Flank Speed Demo - Collaboration (SYNTHETIC); environment=Microsoft365DoD; tenantReference=synthetic-flank-speed-demo-tenant. No live resource, tenant entitlement, or connector is asserted.

Operating team

Harbor Collaboration Demo Team | collaboration@example.invalid. This address is intentionally non-routable.

Customer onboarding and acceptance

1. Identify a fictional mission information owner and select only applicable capabilities.
2. Review the boundary, customer duties, reference conditions, and disclosed moderate finding.
3. Confirm the application records a reviewed provider release and a separate customer association; importing a file creates neither entitlement nor authority.
4. Record customer-owned controls and evidence tasks before any inheritance decision.
5. Obtain mission-level review through the normal authorization process. No synthetic reference substitutes for it.

Service change and exit

The team provides a fictional ten-business-day notice for planned customer-impacting changes. Emergency changes require a next-business-day review. On exit, agree evidence export scope, revoke demo associations, and document customer retention obligations; this package does not implement those actions.

Exchange Online collaboration mail

Component: M365-component-exchange — Demo Exchange mail and transport configuration.

Coverage: AC-2, SC-7. This is partial control support, not full control satisfaction.

Provide a fictional SaaS collaboration mail configuration for Flank Speed Demo; no Azure subscription resources are included.

Provider: Maintain documented mail-flow defaults, operator access controls and service-impact notifications for the demo boundary.

Shared: Review approved external mail domains and investigate delivery-policy exceptions with tenant administrators.

Customer: Approve mailboxes, review distribution groups, label messages and enforce mission-specific handling restrictions.

Review evidence: M365-E01: synthetic mail-flow review and mailbox access sample.

Teams meetings and messaging

Component: M365-component-teams — Demo Teams meeting policy service.

Coverage: AC-2, AC-4. This is partial control support, not full control satisfaction.

Cover tenant-level meeting and messaging policy templates; voice carrier connectivity and endpoint configuration are excluded.

Provider: Version baseline meeting policies and track changes to guest, federation and anonymous-join defaults.

Shared: Review external collaboration requests and test meeting restrictions with designated customer administrators.

Customer: Approve team membership, meeting organizers and guests; manage meeting content and user training.

Review evidence: M365-E02: synthetic meeting-policy export and guest access test.

SharePoint and OneDrive content

Component: M365-component-sharepoint — Demo document collaboration policy service.

Coverage: AC-3, AC-6. This is partial control support, not full control satisfaction.

Cover fictional site-sharing templates and document access policy; no customer content is imported.

Provider: Maintain baseline external-sharing limits and publish tested administrative configuration guidance.

Shared: Validate site exceptions and review sharing reports with customer information owners every month.

Customer: Assign site owners, remove stale sharing links, classify content and approve site-level permissions.

Review evidence: M365-E03: synthetic site-sharing review and access revocation test.

Purview retention and audit

Component: M365-component-purview — Demo collaboration audit and retention service.

Coverage: AU-2, AU-6, AU-11. This is partial control support, not full control satisfaction.

Describe configured collaboration audit categories and a fictional 365-day retention design, not a purchased license entitlement.

Provider: Maintain audit export schedules and retention-policy templates; document gaps in the customer evidence handoff.

Shared: Confirm licensed functionality before any real deployment and reconcile evidence delivery with customer reviewers.

Customer: Select records schedules, perform legal review, investigate user activity and approve legal holds.

Review evidence: M365-E04: synthetic audit-delivery ledger and retention retrieval rehearsal.

Tenant access safeguards

Component: M365-component-identity — Demo Entra collaboration access policy.

Coverage: IA-2, AC-2. This is partial control support, not full control satisfaction.

Cover SaaS collaboration access policy templates for the demo tenant, independently of Azure shared-service operations.

Provider: Version MFA and privileged-admin policy guidance and track provider support account approvals.

Shared: Test emergency access procedures and review privileged roles jointly every month.

Customer: Enroll users, enforce device compliance, run joiner/mover/leaver processes and approve conditional-access exceptions.

Review evidence: M365-E05: synthetic MFA policy review and emergency-access rehearsal.
